Course Overview:

This 5-day hands-on course is focused on hands-on experiments for glycomics and glycoproteomics by mass spectrometry. Participants will release N- and O-glycans, perform permethylation, profiling, and sequencing by NSI-MS/MS and MALDI-MS techniques and also includes a special module on glycoproteomics. Other hands-on experiments include glycolipid analysis and lectin blotting experiments. Lectures by Drs. Pepi, Archer-Hartmann, Azadi, Wells/Orlando and include topics on monosaccharide and oligosaccharide analysis by HPAEC mapping the glycosylation sites in glycoproteins, glycopeptide analysis, determining the composition, quantitation of glycans, sequencing and branching points of N- and O-linked oligosaccharides, and MS procedures used in these analyses.

Takeaways:

- Understand basic principles of protein and lipid glycosylation, structure, and function within biological systems.
- Learn hands-on analytical techniques to release, isolate, and permethylate N- and O-linked glycans
- Familiarize with methods to analyze glycans and glycopeptides using MALDI, LC-MS, tandem MS, and multiple fragmentation techniques.
- Experience hands-on data interpretation with provided example datasets, available databases and downloadable software.
- Featured lectures include:
  - “Overview of Glycoprotein Structures, Biosynthesis and Function” - Dr. Kelley Moremen
  - “Glycans Linked to Lipids and Lipid Precursors” – Dr. Michael Tiemeyer
  - “Bacterial Glycoproteins”- Dr. Christine Szymanski
  - “Regulation of Notch with Glycosylation”- Dr. Robert Haltiwanger
- Your choice of NMR, Mass Spectrometry, or Molecular Modeling breakout session

Preparation:

- All courses are hands-on and in-person
- While we will provide PPE, you are welcome and encouraged to bring a lab coat and pipettors.
- Participants should be familiar with basic fundamentals of biochemical analysis
Instructors:

**Dr. Parastoo Azadi** - Dr. Parastoo Azadi received her B.Sc. in Chemistry in 1987 from University of North London, UK and her Ph.D. degree in biochemistry in 1991 from Imperial College of Science and Technology, University of London, studying structural characterization of carbohydrates and glycoproteins by mass spectrometry under the supervision of Profs. A. Dell and H.R. Morris. Since 2001, Dr. Parastoo Azadi has been the Technical Director of Analytical Service and Training at the Complex Carbohydrate Research Center. The samples submitted for these types of analyses come from academic, government, non-profit organizations and private companies, throughout the United States and internationally.

**Dr. Kelley Moremen** - Dr. Moremen received his B.S. in Biology and Chemistry (1978) from Dickinson College and his Ph.D. in Molecular Biology (1984) from Vanderbilt University and a pursued postdoctoral training at the Massachusetts Institute of Technology. In 1991, Dr. Moremen joined the faculty of the Complex Carbohydrate Research Center at the University of Georgia where he is now Professor in the Department of Biochemistry and Molecular Biology. Dr. Moremen has chaired the Glycobiology Gordon Research Conference, served as President, member of the Board of Directors, and Secretary of the Society for Glycobiology. He presently directs efforts on an NIH funded multi-investigator 'Resource for Integrated Glycotechnology', is a senior investigator on the NIH-funded 'National Center for Biomedical Glycomics', and is a lead Principal Investigator or Senior Investigator on eight additional grants from the NIH and Department of Energy. He has served on editorial boards of Journal of Biological Chemistry, Glycobiology, and Glycoconjugate Journal, numerous NIH grant review panels, and Scientific Advisory Boards of four biotech companies. In 2014 Dr. Moremen was appointed the Distinguished Research Professorship in Biochemistry and Molecular Biology at the University of Georgia and has a total of 10 patents and over 150 peer-reviewed publications. In 2018, he launched the biotech startup, Glyco Expression Technologies, Inc., that is located in the UGA Innovation Gateway.

**Dr. Robert Haltiwanger** - Dr. Haltiwanger received his B.S. in Biology (1980) and Ph.D. in Biochemistry (1986) from Duke University. He went on to do postdoctoral work at Johns Hopkins University School of Medicine, and took his first independent position as an Assistant Professor in the Department of Biochemistry and Cell Biology at Stony Brook University (1991). He rose through the ranks to full Professor and served as Chair of that Department for 8 years. He moved to the CCRC in 2015 as the GRA Eminent Scholar in Biomedical Glycosciences. He has served as President of the Society for Glycobiology, Chair of the Glycobiology Gordon Conference, and currently serves as Editor-in-Chief of the journal Glycobiology.
Dr. Michael Tiemeyer - Dr. Tiemeyer received his B.A. in biology in 1982 and his Ph.D. in neuroscience in 1989 from The Johns Hopkins University. He was a Helen Hay Whitney postdoctoral fellow in developmental neurobiology at the University of California at Berkeley. Prior to joining the CCRC faculty, Dr. Tiemeyer was a faculty member in cell biology at Yale University School of Medicine and Director of Biochemical and Clinical Analytics and New Methods Development at Glyko/Biomarin, Inc.

Dr. Christine Szymanski - Dr. Szymanski has been exploring bacterial glycomics for more than two decades, working on food pathogens since the early 1990s, with a particular emphasis on Campylobacter jejuni. She combines her expertise in food safety and animal health with novel therapeutic diagnostic platforms developed during her postdoctoral fellowship at the Naval Medical Research Center vaccine program (1996-2000), the key findings while employed at the National Research Council of Canada (2000-2008), and the translational advances during her tenure as an Alberta Innovates Technology Futures Scholar at the University of Alberta (2008-2016). She was the first to demonstrate that bacteria are capable of N-glycosylating proteins and is now exploiting these systems to create glycoconjugate vaccines and oral therapeutics through recombinant expression in Escherichia coli. Dr. Szymanski was also the first to demonstrate that viruses specific for bacteria express proteins that can be used as novel therapeutics in addition to their recognized diagnostic value. These viruses (bacteriophages) are the most abundant biological entity on earth (10^31) and are therefore a limitless resource for exploitation, especially in the area of glycomics.

Dr. Lauren Pepi - Dr. Lauren Pepi received her B.A. (ACS certified) in Chemistry and Biology in 2015 from Assumption University (Worcester, MA) and her Ph.D. in Analytical Chemistry in 2020 from the University of Georgia under the direction of Dr. Jon Amster. Her Ph.D. work focused on fundamental studies of tandem mass spectrometry of glycosaminoglycans. Lauren joined the Analytical Service and Training team at the end of 2020, where her research focuses on glycomic and glycoproteomic characterization of N- and O-glycans using mass spectrometry techniques. Lauren has experience using a wide range of mass spectrometers, including FT-ICR MS, Orbitrap MS, MALDI MS and Ion trap MS.

Dr. Stephanie Archer-Hartmann – Dr. Stephanie Archer-Hartmann received her B.Sc. in Chemistry in 2006 and her Ph.D in Analytical Chemistry in 2012 from West Virginia University. She has spent more than 10 years working towards improvements for the analysis of carbohydrates, including the isolation, preparation, and analysis of glycosaminoglycans.
**Dr. Bhoj Kumar** - Dr. Bhoj Kumar received a BSc. in Biology and MSc. in Biotechnology in 2006 from the Pt. Ravishankar Shukla University and his Ph.D. in Biotechnology in 2014 from the Giwaji University India. After his doctorate, he joined Regional Centre for Biotechnology as Postdoctoral Research Associate and worked on the Mass spectrometry-based Biomarker discovery for Preterm Birth conditions. Dr. Kumar joined the CCRC in Aug 2021.

**Dr. Lance Wells** – Dr. Wells received his B.S. in Chemistry, with a minor in Psychology, in 1991 from the Georgia Institute of Technology, and after spending two years working at the Microchemical Facility, his Ph.D. in Biochemistry and Molecular Biology in 1998 from the Emory University School of Medicine. A postdoctoral research fellowship at the Johns Hopkins School of Medicine in Biological Chemistry followed, which was supported by a National Research Service Award from the National Cancer Institute of the NIH. He is a professor in the Complex Carbohydrate Research Center, conducts research that provides a foundation for understanding O-glycans, which play a critical role in determining protein structure, function and stability.

**Dr. Christian Heiss** – Dr. Christian Heiss received his B.Sc. in Chemistry in 1991 from the University of Erlangen, Germany, and his Ph.D. in Organic Chemistry in 1999 from the University of Georgia. He serves as the Assistant Technical Director of Analytical Service and Training at the Complex Carbohydrate Center. He has written multiple papers on the analysis of carbohydrates, and established the expansion of the CCRC’s analysis to glycosaminoglycans in 2006.

**Dr. Lachele Foley** – Dr. Foley received a B.S. in Physical Science from Auburn University in 1988, a M.Ed. in Science Education from the University of Georgia in 1992, and a Ph.D. in Chemistry in 2002. She is currently an Associate Research Scientist at the University of Georgia where she focuses on techniques for modeling of carbohydrates with Dr. Rob Woods.
SEPARATION AND CHARACTERIZATION OF GLYCOPROTEIN AND GLYCOLIPID OLIGOSACCHARIDES

August 14-18, 2023

Monday, August 14, 2023

8:45 a.m. - 9:00 a.m.
Introduction and Welcome
Dr. Parastoo Azadi

9:00 a.m. - 10:00 a.m.
Lecture - “Overview of Glycoprotein Structures, Biosynthesis and Function”
Dr. Kelley Moremen

10:00 a.m. - 10:15 a.m. – Break

10:15 a.m. - 11:15 a.m.
Lecture continued – “Overview of Glycoprotein Structures, Biosynthesis and Function”
Dr. Kelley Moremen

11:15 a.m. – 12:00 p.m.
Lab Exercise discussion
 SECTION I – Monosaccharide composition analysis by HPAEC-PAD Laboratory

SECTION I – Monosaccharide composition analysis
Begin acid hydrolysis
Dr. Varughese (Alex) Mulamoottil

12:00 p.m. – 1:00 p.m. – Lunch

1:00 p.m. – 2:00 p.m.
Lecture – “Bacterial Glycoproteins”
Dr. Christine Szymanski

2:00 p.m. – 2:45 p.m.
Lab Exercise discussion
 SECTION IV - Permethylation of glycans
Dr. Lauren Pepi/Nathan Murray

2:45 p.m. – 3:00 p.m. - Break
3:00 p.m. – 3:30 p.m.

Laboratory

SECTION I – Monosaccharide composition analysis
Recover samples from hydrolysis, freeze digest and lyophilize

Dr. Varughese (Alex) Mulamoottil

SECTION II – Release of N-linked glycans from a glycoprotein (Fetuin)
Denature glycoprotein and start trypsin digestion

Dr. Lauren Pepi

3:30 p.m. – 4:15 p.m.

Lab exercise discussion

SECTION VI – Separation of glycolipids by TLC

Laboratory

SECTION VI – TLC analysis
Desialylation of porcine brain gangliosides

Dr. Stephanie Archer-Hartmann

4:15 p.m. – 5:00 p.m.

Lab Exercise discussion

SECTION III – Release of O-glycans from a glycoprotein (Mucin)

Laboratory

SECTION III – Release of O-glycans
β-elimination of O-linked glycans

Dr. Bhoj Kumar

Tuesday, August 15, 2023

9:00 a.m. – 9:15 a.m. – Questions and Discussion

9:15 a.m. – 10:15 a.m.

Lecture – “Introduction to HPAEC”

Dr. Parastoo Azadi

10:15 a.m. – 10:30 a.m. – Break

10:30 a.m. – 12:00 p.m.

Laboratory
**SECTION II** – Release of N-glycans
Terminate Trypsin digestion of Fetuin

Dr. Lauren Pepi

**SECTION III** – Release of O-glycans
Neutralization and de-salting of beta-eliminated O-linked glycans

Dr. Bhoj Kumar

**SECTION VI** – TLC analysis
Sample cleaning by C18 reversed phase cartridge
Dry sample under N₂

Dr. Stephanie Archer-Hartmann

12:00 p.m. – 1:00 p.m. – **LUNCH**

1:00 p.m. – 2:15 p.m.
**Lecture** – “Regulation of Notch with Glycosylation”

Dr. Robert Haltiwanger

2:15 p.m. – 3:00 p.m. – **CCRC Tour**

3:00 p.m. – 3:10 p.m. – **Break**

3:10 p.m. – 3:40 p.m.
**Laboratory**

**SECTION I** – Monosaccharide composition analysis
Preparation of monosaccharide digests for HPAEC analysis

Dr. Varughese (Alex) Mulamoottil

**SECTION II** – Release of N-glycans
Release N-glycans with PNGase F

Dr. Lauren Pepi

3:40 p.m. – 5:00 p.m.
**Lab exercise discussion**

**SECTION V** – Detection and analysis of carbohydrates by lectin blotting

**Laboratory**

**SECTION V** – Lectin blotting
Blotting samples on nitrocellulose membrane, blocking
Wednesday, August 16, 2023

8:45 a.m. – 10:00 a.m.

**Lecture** – “Glycans Linked to Lipids and Lipid Precursors”

Dr. Michael Tiemeyer

10:00 a.m. – 10:10 a.m. – **Break**

10:10 a.m. – 11:10 a.m.

**Lecture** – “Labeling and Separation of Carbohydrates”

Dr. Stephanie Archer-Hartmann

11:10 a.m. – 12:00 p.m.

**Laboratory**

**SECTION II** – Release of N-glycans

Separation of N-glycans from O-glycopeptides/peptides by C18 sep pak

Dr. Lauren Pepi

12:00 p.m. – 1:00 p.m. – **LUNCH**

1:00 p.m. – 2:00 p.m.

**Laboratory**

**SECTION III** – Release of O-glycans

Removal of Borates from beta-eliminated O-linked glycans

Dr. Bhoj Kumar

2:00 p.m. – 2:30 p.m.

**SECTION I** – HPAEC Data Discussion

Dr. Varughese (Alex) Mulamoottil

2:30 p.m. – 2:40 p.m. – **Break**

2:40 p.m. – 4:00 p.m.

**Laboratory**

**SECTION VI** – TLC analysis
Spot samples
Develop plate
Detection of samples

Dr. Stephanie Archer-Hartmann

4:00 p.m. - 5:00 p.m.
Laboratory

SECTION V – Lectin blotting
Wash blots
Probe blots with lectins

Dr. Lauren Pepi

Thursday, August 17, 2023
Laboratory

8.45 a.m. – 10:10 a.m.

SECTION IV – Permethylation of released oligosaccharides
(N-glycans from Fetuin or O-glycans from Mucin)

10:10 a.m. – 10:20 a.m. – Break
10:20 a.m. – 11:00 a.m.

Laboratory

SECTION IV – Permethylation (continued)/ Introduction to micropermethylation

Dr. Lauren Pepi/ Nathan Murray

11:00 a.m. – 12:00 p.m.

Laboratory

SECTION V – Lectin blotting
Wash blots
Overlay with antibody –AP (45 min ~ 1 h incubation during lunch)

Dr. Lauren Pepi

12:00 p.m. – 1:00 p.m. – LUNCH
1:00 p.m. – 2:15 p.m.
Laboratory

**SECTION V – Lectin blotting**

Wash blots
Color development, record results

Dr. Lauren Pepi

2:15 p.m. – 2:55 p.m.

**Demonstration**

MALDI TOF/TOF MS demonstration

Dr. Bhoj Kumar

2:55 p.m. – 3:05 p.m. – **Break**

3:05 p.m. – 3:45 p.m.

HPAEC and HPLC/CE demonstration

Dr. Varughese (Alex) Mulamoottil / Dr. Stephanie Archer-Hartmann

**Discussion of data**

3:45 p.m. – 4:00 p.m.

**SECTION VI – TLC results**

Analysis of TLC data

Dr. Stephanie Archer-Hartmann

4:00 p.m. – 4:15 p.m.

**SECTION V – Lectin blotting results**

Analysis of lectin blotting

Dr. Lauren Pepi

4:15 p.m. – 5:00 p.m.

**SECTION II, III, IV – MALDI TOF/TOF-MS result**

Analysis of N-and O-linked glycans MALDI data & Data analysis

Dr. Lauren Pepi / Dr. Stephanie Archer-Hartmann

Friday, August 18, 2023

<Mass Spectrometry Module>
9:00 a.m. – 12:00 p.m.

**Lecture – Glycomics & Glycoproteomics**

Dr. Lance Wells

10:15 a.m. – 10:30 a.m. – **Break**

12:00 p.m. – 1:00 p.m. – **LUNCH**

1:00 p.m. – 3:00 p.m.:

**Orbi-Fusion MS Demonstration and MSMS Data Discussion**

Dr. Lauren Pepi / Dr. Bhoj Kumar

**Or <NMR Module>**

9:00 a.m. – 12:00 p.m.

**Lecture – “Introduction to NMR of glycoproteins and carbohydrates”**

Dr. Christian Heiss

12:00 p.m. – 1:00 p.m. – **LUNCH**

Afternoon:

Demonstration and data interpretation

**Or <Molecular Modeling Module>**

9:00 a.m. – 12:00 p.m.

**Lecture – “Introduction to Molecular Modeling**

Dr. Lachele Foley

12:00 p.m. – 1:00 p.m. – **LUNCH**

Afternoon:

Demonstration and data interpretation

**Course summary, course evaluation final Q&A**
